

This is absolute nonsense. I turned to XM radio because of my complete revulsion with standard radio (Clear Channel, Radio One, etc.). They have the unmitigated gall to want to restrict satellite radio from offering something as innocuous as local weather but they sponsor garbage like "Mancow Muller" and "Howard Stern". Hello?

Mr. Powell,

Please do your duty as a "public servant" and give the people you serve what they want. These broadcasting companies don't pay your salary, we do. XM or Sirius satellite radio giving me weather information at 12:30 am or traffic information at 8 pm isn't hurting them one bit.
